Queritur utrum loyca dividatur in loycam docentem et utentem. Respondeo quod scilicet dicendum
loyca naturalis est qualitas hominum intellectus naturalis et illas loycas sunt proposi-
tiones et termini et termina sunt quedam intentiones quas sequuntur et consequentur
contendunt et consistunt. Sed loyca docens est scientia docens diffinire dividere
arguere et quantitatem partium [illegible] [illegible] distinctis. Sed loyca utens est qualitas
acquisita consequitur [illegible] ut respondere et loyca naturalis et loyca utens non sunt
scientie sed sola loyca docens. Contra: scientia dividitur in scientiam et non scientiam sed loy-
ca est scientia ergo non debet dividi in scientiam et non scientiam [illegible] [illegible] [illegible] [illegible]
[illegible] non est quod scientia non potest esse non scientia que implicat contradictionem [illegible] scientia de-
[illegible] in non scientiam quod [illegible] [illegible] [illegible] [illegible] transmittantur. Contra: utrum [illegible]
dicit [illegible] ergo dico [illegible] [illegible] quod loyca naturalis non est scientia [illegible] [illegible] Si dicit
quod est scientia. Contra: loyca naturalis est actus et non scientia [illegible] quia scientia [illegible] et ut
[illegible] scientia loyca naturalis [illegible] [illegible] [illegible] quod [illegible] [illegible] homo et
quod [illegible] distinguendi magis notum [illegible] noto [illegible] homo et
[illegible] non est [illegible] in plures loycas naturales [illegible] quod non in [illegible] [illegible] Contra
[illegible] divisio dicit [illegible] [illegible] [illegible] [illegible] non est ergo divisio non [illegible] [illegible]
quod [illegible] est scientia loyca utens et loyca [illegible] quod [illegible] [illegible] loyca utens et loy-
ca [illegible] ergo loyca utens et loyca docens [illegible] ab eodem [illegible] quod [illegible] accepta
[illegible] scientia [illegible] [illegible] loyca docens et loyca [illegible]
[illegible] dicitur [illegible] [illegible] [illegible] analogum in [illegible] analogata [illegible]
quod non analogum in [illegible] analogata [illegible] loyca docens et logica utens [illegible] [illegible] lo-
gica ergo [illegible] est analogum in [illegible] analogata [illegible] quod loyca docens et lo-
yca docens et utens [illegible] [illegible] quod loyca docens et utens ergo logica do-
cens et utens [illegible] quod [illegible] loyca quod utrum [illegible] [illegible]
[illegible] loyca ergo [illegible] [illegible] [illegible] [illegible] in logicam docentem et
naturalem et utentem et loyca non est scientia et [illegible] logica est scientia [illegible] quod
[illegible] loyca docens est scientia [illegible] logica utens et [illegible] non est impos-
sibile quod logica dividitur in scientiam et non scientiam et [illegible] [illegible] [illegible] ergo loyca
[illegible] dividitur in loycam naturalem et utentem quod [illegible] scientia et [illegible] [illegible]
[illegible] loyca [illegible] scientia [illegible] dividitur in loycam utentem sed loyca [illegible]
ad loycam docentem quod est scientia non dividitur in loycam utentem et naturalem sed [illegible]
et [illegible] [illegible] [illegible] [illegible] quod non sit logica naturalis [illegible]
[illegible] [illegible] actus. [illegible] sunt due opiniones una via dicit quod [illegible]
actus [illegible] [illegible] [illegible] [illegible] [illegible] quod nulla scientia [illegible]
[illegible] alia via dicit quod [illegible] logica [illegible] [illegible] [illegible] quod logica naturalis
non est aliud [illegible] intellectus et [illegible] [illegible] [illegible] est [illegible]

[illegible] [illegible] aliquis [illegible] non est [illegible] logica naturalis sed magis [illegible] [illegible]
[illegible] [illegible] [illegible] [illegible] magis [illegible] distinguit magis
[illegible] [illegible] [illegible] [illegible] [illegible] via quod logica naturalis est [illegible]
apud omnes homines quia [illegible] [illegible] [illegible] [illegible] apud omnes homines quia
non [illegible] magis [illegible] [illegible] ista opinio est [illegible] magis et
[illegible] [illegible] [illegible] [illegible] quod [illegible] est [illegible] apprehendendo [illegible]
[illegible] [illegible] [illegible] [illegible] [illegible] [illegible] logica [illegible] et non naturalis [illegible] quod [illegible] [illegible]
[illegible] [illegible] [illegible] respondendo [illegible] [illegible] [illegible] [illegible] [illegible] [illegible]
[illegible] quod loyca est scientia quod est [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible]
[illegible] est [illegible] quod [illegible] [illegible] [illegible] [illegible] [illegible] sed [illegible] ista [illegible] [illegible]
non potest [illegible] quod [illegible] est [illegible] logica utens et logica [illegible] [illegible] [illegible] quia [illegible]
[illegible] loyca utens et loyca docens quod [illegible] non [illegible] [illegible] [illegible]
[illegible] [illegible] [illegible] [illegible] [illegible] [illegible] quod dicitur [illegible] [illegible] [illegible] [illegible]
[illegible] [illegible] [illegible] [illegible] divisione [illegible] [illegible] [illegible] non
[illegible] [illegible] divisione analogi in sua analogata [illegible] [illegible] divisio ut [illegible]
[illegible] [illegible] [illegible] dicitur quod ista divisio est analogi in sua analogata
[illegible] [illegible] [illegible] [illegible] [illegible] [illegible] logica docente et [illegible]
[illegible] quod [illegible] [illegible] [illegible] [illegible] quod [illegible] [illegible] logica docens et logica utens ibi dicitur quod loy-
[illegible] [illegible] quod dicitur [illegible] logica docens et logica utens quod [illegible] [illegible] loy-
ca utens [illegible] [illegible] [illegible] loyca utens [illegible] utens quod [illegible] [illegible] [illegible] loy-
ca docens et logica utens et non [illegible] [illegible] logica utens [illegible] loy-
logica utens dicitur [illegible] [illegible] quod est qualitas acquisita [illegible] [illegible]
respondere et loyca docens non est logica utens [illegible] logica [illegible] utens
[illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] ergo [illegible]
divisione loyca [illegible] [illegible] [illegible] [illegible] [illegible] est [illegible] [illegible] [illegible] [illegible]
[illegible] quod docens loyca [illegible] [illegible] [illegible] [illegible] [illegible]
actus. Contra: loyca docens est [illegible] [illegible] loyca docens [illegible] est [illegible] [illegible]
et [illegible] scientia. Contra: [illegible] loyca est scientia [illegible] [illegible] est scientia et [illegible] est loyca
ergo logica est scientia. Si dicitur quod loyca [illegible] est [illegible] scientia non [illegible] abstractive
Contra: loyca [illegible] [illegible] est scientia [illegible] quod [illegible] est scientia et [illegible] est logi-
ca docens abstractive [illegible] [illegible] ergo loyca [illegible] est scientia [illegible] [illegible] [illegible]
loyca docet ergo [illegible] est docens loyca [illegible] ab eodem [illegible] Contra [illegible] Si
loyca [illegible] actus [illegible] [illegible] debet [illegible] [illegible] [illegible] sed loyca in nullo [illegible] est [illegible]
[illegible] non est [illegible] non in [illegible] alio quod non [illegible] quod est in libro [illegible]
[illegible] non [illegible] [illegible] in pluribus [illegible] [illegible] [illegible] actus non potest [illegible] in [illegible]
[illegible] Si dicitur quod pluribus [illegible] [illegible] [illegible] [illegible] Contra [illegible] quod loyca [illegible]
intellectu [illegible] [illegible] [illegible] quod [illegible] non [illegible] [illegible] quod [illegible] loyca
non est in ipso intellectu [illegible] Contra [illegible] loyca docens non est [illegible] quod
non loyca docens est ergo nulla loyca docens est [illegible] [illegible] [illegible]
primo [illegible] et [illegible] [illegible] quod loyca est [illegible] [illegible]

quod nullo dependet et sic logica non degeneret et sic est [illegible] dependens et non quod dependeret ab aliquo sic logica [illegible]

[illegible] ista [illegible]

potest idem secundum unum esse contra aliam et reliquum erit contra aliam secundum
simile est. Ulterius potest idem anno et certe secundum simile esse contra aliam ergo ulterius
esse contra aliam. Contra conclusio ulterius non esse contra aliam et non potest ulterius
tenere patet quia ulteriores esse intellectu abstracta quidditatibus individuorum
naturalium et tunc ratio formae est rationi et sic probat. Contra tertia conclusio
ulterius quorum individua potest contra aliam et tunc in individuali
vel proprie secundum simile potest contra aliam sic patet quod esse ista in
individuali et non simile etc in individualibus secundum ulterius esse ista individua
ubi patet in solo et proprio et non et in individualibus secundum si dicit secunda
quod ulteriora essent compatibilia et ulteriora potest in pluribus et primo potest esse
implicatio quorum quod patet respectu potest etc ubi tempore causate in
intellectum ulterius sunt in ignorabile et incomplete requisita erit et ista
individuali et in ignorabile et compatibile etc et primum non esse sic
simile secundum principiorum intellectui abstracta quidditatibus individualibus et
simile esse sic. Contra dicendo tunc ulterius dicit etc in pluribus secundum patet non potest
in pluribus quia esse ista in individuali et ut plures esse duo quod
est cum repugnat in pluribus et sic non esse ulterius aliud esse non
non repugnat in pluribus et sic non esse ulterius. Contra alio aliquid dicitur
unum dicitur non unitate realiter ista unum non potest in pluribus aliud
unum dicitur unitate precisa etc sed unum potest in pluribus patet in doctrina
sicut patet homo et rationem speciei patet in materia praeter quod
aliud actum proprio contingit essentiam quibus dicitur unius quod tunc
quae sunt potest apprehensa per intellectum etc proprie non sustinerentur
quibus et sic isti dicunt quod ponunt ulterius esse praeter intellectui ab-
stractarum quidditatibus individuorum aliquo contingit proprio
essentiam quibus quae potest apprehensa per intellectum etc sed proprio esse
sustinentur quibus patet ista propositio sicut Commentator secundum solum
facto ulterius non potest in solo intellectualibus cum stat omni ulteriora
intendo potest in facto intellectu ergo ulteriora intendo potest contra ab ergo
advenientes etc et non advenientes sed ulteriora intendo in facto
intellectualibus sunt ergo ulteriora intendo intelligunt ulteriora ulteriora non
intelligunt ergo proprio intellectu secundum non sunt proprio ergo non intellectui aliquid
quod non sunt proprio propriis ergo non intelligunt contra quidquid quidquid
intelligitur sic proprio intellectu sic ulteriora in proprio et sensibile sic

in facto intellectualibus 200 annis quod potest in intellectu cum nihil convenit
proprie rei ante quam sit et ulterius sic esse ulterius et proprie nihil convenit proprie
rei ante quam in sic convenit proprie proprietas sic propositio quod potest
ulterius et chimera esse in intellectu facto ergo sic quod ulterius potest in intellectu facto
Dicimus ista quia non videlicet ulteriora in conclusio potest in facto intellectualibus valet
quod dicit tertia ab 3o adveniente ad secundum et non advenientes etc. Et de quarta quia
non videlicet in terminis in aliquo supponentibus secundum illi primo supponunt. Contra alio dicit
quod ulteriora bene intelligunt proprio alienas quia ista potest nos dicit in
cognitione alterius rei et sic per abstractionem quidditatibus individualibus secundum in
proprio propriis quia non potest etc alienae proprio non denotat abstractio esse cogni-
tionem secundum per abstractionem. Contra alio sicut animo sic non adaequate convenit
aliquid intellectum quia si aliquid ei convenit adaequate et sic sit
Plato et ~~non~~ fuit Platonem etc alios homines secundum bene aliquid ei ab-
solute convenit secundum non adaequate. Contra alio admitto quod chimera
potest ulterius etc sed sibi nihil convenit intellectu mediante copula de simul secundum bene
ei convenit aliquid intellectu mediante copula de intelligit ut patet dicit quod
convenit sibi aliquid intellectu mediante copula de simul mediantibus propositionibus
sic de per se etc adveniente ulterius et sic supponendo etc patet quod potest dicit ad
quaestiones etc.

Et nunc utrum ulteriora sint in intellectu intellectus secundum propositionem intellectus
modus dicit quia non dicit esse informatus propriis intelligibilibus secundum aptus
modus dicit quia non dicit esse informatus propriis intelligibilibus sicut tabula
informari potest intellectus in quo potest secundum esse tanquam tabula
rasa in qua nihil est depictum aptum tamen depingi 3o de anima ista
notabilia stante et sic adventiones quod ulteriora sunt in intellectu intellectualibus
etc sed omne id quod esse in intellectu in formato propriis intelli-
gibilibus et non est in intellectualibus secundum ulteriora potest in intellectu informa-
to propriis intelligibilibus ergo non sunt in modo intellectu. Contra aliquid im-
plicat contradictionem ulteriora in intellectu intellectualibus quod sic bene potest in intellectu
ergo potest in intellectu informato propriis intelligibilibus et contra aliam potest sunt in in-
tellectu ergo potest in intellectu non informato propriis intelligibilibus et hoc
implicat contradictionem. Commentator ulteriora sunt in intellectualibus ergo non sunt
secundum si non esset in intellectualibus impossibile esset quod esset de intellectu
